B.O.T.S.S.™

BATTLE OF THE SOLAR SYSTEM

MicroProse Games revolutionized arcade graphics technology with F-15 Strike Eagle. Now, MicroProse Games prepares to do it again with Battle of the Solar System, a futuristic 3-D combat/action extravaganza placing players at the helm of giant warbots capable of unleashing unbelievable firepower in devastating interplanetary wars.

Players of all ages will flock to the arcades for the chance to control these warbots, in their many shapes and sizes, and their vast arsenal of weaponry: which includes pulse cannons, nuclear missiles, plasma balls, neutrino guns, and neutron blasters.

B.O.T.S.S. is designed with features we know arcade gamers **pay** to experience.

- Buy-ins for continued play, new weapons and repairs.
- A high-tech futuristic setting reminiscent of classic science-fiction/adventure films like *The Terminator, Aliens* and *Blade Runner.*
- Non-stop action in amazingly detailed 3-D graphics.
- A variety of awesome armaments for the player to blast enemy warbots.
- A wide variety of enemy warbots to challenge, each warbot class with its own strengths and methods of attack.
- Increasing challenges, as players progress from a relatively simple battle on the planet of Pluto to an apocalyptic confrontation on the enemy warbots' home base — Earth.
- Streamlined controls that are easy to use and let players start blasting right away.
